

Our door systems are widely used for Local Authority and Commercial pool areas. Key specifiers are avoiding timber, laminated or steel door specifications in pool environments.

GRP door systems are specified for 50-60% of all new / refurbished changing areas / pools in the UK, including the new Royal Commonwealth Pool in Edinburgh and London Olympic 2012 pools. The main reasons are listed below –

## PRESSURE MOULDED GRP DOORS ARE SPECIFIED FOR:

- All Swimming Pool / Changing Areas
- Areas where doors need to be FREE of Laminations, Joints, Lippings, Paint, Steel, Timber, MDF, Rot, Rust, Warping, Splitting : Denting
- Areas where doors need to be Waterproof : Resistant Against Stains and Chlorine
- Areas where doors need to be Durable : Ideal for Public & Disable Access

## PRESSURE MOULDED GRP DOORS CAN BE SPECIFIED WITH:

- Fire test certified to BS 476, Part 22 and BS EN 1634-1:2008 : Single / Double action, Sliding and Automatic Operation : Full range of Ironmongery and Glazing Specifications
- Frame options from GRP, Aluminium, Steel : Stainless Steel
- Complete Installation & After Service

## HIGH PERFORMANCE - LOW MAINTENANCE
